

PHYSICS (PHY)

PHY 101. College Physics I. 4 Credit Hours.

Elementary mechanics, thermal phenomena, fluids, waves. Courses 101-102-106-108 provide a ten-credit 'physics with lab' sequence without calculus.

Prerequisite: MTH 105 or higher (excluding MTH 113). Corequisite: PHY 106.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

PHY 102. College Physics II. 4 Credit Hours.

Electromagnetism, optics, and modern physics.

Pre-requisite: PHY 101 And Co-requisite: PHY 108.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

PHY 103. General Physics. 3 Credit Hours.

Mechanics, waves, electromagnetism.

ARCHITECTURE MAJORS.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

PHY 106. College Physics Laboratory I. 1 Credit Hour.

Laboratory course to accompany PHY 101, 201, or 211.

Pre/Corequisite: PHY 101 or PHY 201 or PHY211.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

PHY 108. College Physics Laboratory II. 1 Credit Hour.

Laboratory course to accompany PHY 102, 202, or 212.

Prerequisite: PHY 102 or PHY 202 or PHY 212. Or Corequisite: PHY 102 or PHY 202 or PHY 212.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

PHY 110. Descriptive Astronomy. 3 Credit Hours.

For students not majoring in Mathematics or a Physical Science. brief non-technical treatment of the universe and its contents. Mathematical requirements are minimal with emphasis on our present knowledge about energy and matter in space. Not for major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

PHY 160. Physics of the Arts. 3 Credit Hours.

Newtonian mechanics, energy, wave motion, atoms, and electricity. Applications to music, art and communications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 201. University Physics I for the Sciences. 4 Credit Hours.

Calculus based introductory physics: mechanics, heat, fluids, waves, with applications from the physical and life sciences.

Pre-requisite: MTH 141 Or MTH 151 Or MTH 161 Or MTH 171 And MTH 162 Or MTH 172 Or Co-requisite: MTH 162 Or Co-requisite: MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

PHY 202. University Physics II for the Sciences. 4 Credit Hours.

Calculus based introductory physics: electromagnetism, optics, modern physics, with applications from the physical and life sciences.

Prerequisite: PHY 201.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

PHY 211. University Physics I for PRISM. 4 Credit Hours.

Calculus based introductory physics: mechanics, heat, fluids, waves, with applications from the physical and life sciences. Designed for students in the PRISM program.

Pre/Corequisite: MTH 162 or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

PHY 212. University Physics II for PRISM. 4 Credit Hours.

Calculus based introductory physics: electromagnetism, optics, modern physics, with applications from the physical and life sciences. Designed for students in the PRISM program.

Prerequisite: PHY 211.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

PHY 221. University Physics I. 3 Credit Hours.

Mechanics through gravity and harmonic motion, intended for science and engineering students.

Prerequisite: MTH 141 or MTH 151 or MTH 161 or MTH 171 OR Co-requisite: MTH 151. NOTE: Students taking MTH 161 concurrent can contact the Department for special permission.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

PHY 222. University Physics II. 3 Credit Hours.

Fluids, waves, optics, thermal phenomena, intended for science and engineering students.

Prerequisite: PHY 221 or PHY 205 And Pre/Corequisite: MTH 162 or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

PHY 223. University Physics III. 3 Credit Hours.

Electromagnetism through Maxwell's equations, intended for science and engineering students.

Prerequisite: PHY 221 (or PHY 205) and Pre or Corequisite: MTH 162 or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

PHY 224. University Physics II Lab. 1 Credit Hour.

Laboratory to accompany PHY 222.

Prerequisite: PHY 222 or PHY 230 or Corequisite: PHY 222 or PHY 230.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

PHY 225. University Physics III Lab. 1 Credit Hour.

Laboratory to accompany PHY 223.

Prerequisite: PHY 223 or PHY 230 or Corequisite: PHY 223.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

PHY 230. Honors University Physics II-III. 5-6 Credit Hours.

Fluids, waves, optics, thermal phenomena, electromagnetism. Combines PHY 222 and 223.

Prerequisite: PHY 221 and Pre- or Co-requisite: MTH 162 or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

PHY 295. Transfer Credits. 1-5 Credit Hours.

Special topics taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

PHY 306. Intermediate Laboratory. 1 Credit Hour.

Laboratory: a review of some of the fundamental experiments in classical and modern physics.

Prerequisite: PHY 225 or PHY 209 And Pre/Corequisite: PHY 360.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

PHY 315. Mathematical Tools for Physics. 3 Credit Hours.

How to use mathematics. Series, complex algebra, vector analysis, differential equations, etc.

Prerequisite: MTH 141 or MTH 151 or MTH 161 or MTH 171 and Pre/Corequisite: PHY 206 and Pre/Corequisite: MTH 162 or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 321. Thermodynamics and Kinetic Theory. 3 Credit Hours.

An intermediate course in thermal phenomena, from both macroscopic and microscopic points of view.

Prerequisite: PHY 222 or PHY 206 And MTH 211 or MTH 310 Or PHY 315.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

PHY 325. Biological Physics I. 3 Credit Hours.

Applications of fundamental principles from fluids, electrostatics, statistical physics to biological phenomena at molecular and neuronal levels; emphasis on quantitative picture of well-known biological systems; discussion of current research at the interface of biology and physics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 340. Classical Mechanics I. 3 Credit Hours.

Includes harmonic motion, orbit theory, coupled oscillations, rigid body motions.

Prerequisite: PHY 202 or PHY 212 Or PHY 222 and PHY 223 Or PHY 230 or PHY 206 and PHY 207 or (PHY 210) And Pre/Corequisite: MTH 210 and MTH 311 Or Prerequisite: PHY 315.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

PHY 350. Intermediate Electricity and Magnetism. 3 Credit Hours.

Includes the integral and differential forms of Maxwell's equations, circuit theory, and boundary value problems.

Prerequisite: PHY 202 or PHY 212 Or PHY 222 and PHY 223 Or PHY 230 or PHY 206 and PHY 207 or (PHY 210) And MTH 211 or MTH 310 And Pre/Corequisite: MTH 311 Or Prerequisite: PHY 315.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

PHY 351. Intermediate Electricity and Magnetism II. 3 Credit Hours.

A continuation of PHY 350. Includes further application of Maxwell's equations with emphasis on radiation theory.

Requisite: PHY 350.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

PHY 360. Introduction to Modern Physics. 3 Credit Hours.

Emphasis on the experimental foundations of modern physics. Relativity, quantization, atomic structure, radiation, nuclei.

((Prerequisite: PHY 202 or PHY 212 or PHY 230) or (prerequisite PHY 222 and Pre/Corequisite: PHY 223)) And (Prerequisite: MTH 162 Or PHY 315.).

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

PHY 362. Modern Physics Honors Seminar. 1 Credit Hour.

Special Topics to accompany PHY 360. Co-requisite: PHY 360.

Pre-requisite: PHY 360 Or Co-requisite: PHY 360.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

PHY 401. Senior Thesis. 3 Credit Hours.

Research Leading to the writing of a senior thesis - First Semester.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 402. Senior Thesis. 3 Credit Hours.

Research Leading to the writing of a senior thesis - Second Semester.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 501. Research. 1-3 Credit Hours.

Project course introducing methods of research, individual investigation of current problems.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 502. Research in Astrophysics. 1-3 Credit Hours.

Project course introducing methods of research, including modern computational tools such as image analysis, MonteCarlo simulations, spectral fitting. Individual investigation of current problems.

Components: RSC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

PHY 506. Advanced Laboratory. 1-2 Credit Hours.

Advanced experiments such as properties of the electron, optical spectra, electrical measurements, radioactive decay, absorption, etc.

Prerequisite: PHY 225 or PHY 209 And Pre/Corequisite: PHY 360.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

PHY 513. Mathematical Techniques in Physics. 3 Credit Hours.

Complex variables and applications. Infinite series and their uses, particularly in differential equations. Multiple integrals and Fourier series.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 516. Special Topics in Physics. 1-3 Credit Hours.

Special topics in Physics. Topics vary by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 517. Special Topics in Physics. 1-3 Credit Hours.

Special topics in Physics. Topics vary by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 518. Special Topics in Astrophysics. 1-3 Credit Hours.

Special topics in Physics. Topics vary by semester. The course includes the use of modern computational tools used in Astrophysics, such as image analysis, MonteCarlo simulations, spectral fitting.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 522. Solid State Physics. 3 Credit Hours.

Crystal structure, quantum theory of the electronic structure of solids, mechanical, electric, magnetic and optical properties of solids.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 530. Plasma Physics I. 3 Credit Hours.

Kinetic theory of plasmas, adiabatic motion of charged particles magneto fluid dynamics, transport properties of plasmas in electromagnetic fields.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 540. Classical Mechanics II. 3 Credit Hours.

Lagrangian formulation, rigid body dynamics. Topics selected from fluid dynamics, non-linear oscillations, normal modes, phase plane analysis.

Requisite: PHY 340.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

PHY 545. Introduction to Astrophysics. 3 Credit Hours.

Celestial mechanics, solar models, galaxies, distance scales, instruments. Includes the use of modern computation tools applied to astrophysics problems, such as image analysis, MonteCarlo simulations, spectral fitting.

Pre-requisite: PHY 360.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 552. Optical Physics. 3 Credit Hours.

Geometric optics, interference and diffraction, polarized light, optical pumping, coherence phenomena, applications to modern physical research.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 560. Quantum Mechanics and Modern Physics I. 3 Credit Hours.

Introductory theory with applications to simple systems. Perturbation theory and atomic structure.

Pre-requisite: PHY 340 And PHY 350 Or Co-requisite: PHY 350.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

PHY 561. Quantum Mechanics and Modern Physics II. 3 Credit Hours.

Applications of quantum mechanics to atomic and molecular spectroscopy, quantum statistical mechanics, and nuclear physics.

Pre-requisite: PHY 560.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

PHY 606. Advanced Laboratory. 1-2 Credit Hours.

Advanced experiments such as properties of the electron, optical spectra, electrical measurements, radioactive decay, absorption, etc.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

PHY 613. Mathematical Techniques in Physics. 3 Credit Hours.

Complex variables and applications. Infinite series and their uses, particularly in differential equations. Multiple integrals and Fourier series.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 616. Special Topics in Physics. 1-3 Credit Hours.

Special topics in Physics. Topics vary by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 617. Special Topics in Physics. 1-3 Credit Hours.

Special topics in Physics. Topics vary by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 618. Special Topics in Astrophysics. 1-3 Credit Hours.

Special topics in Physics. Topics vary by semester. The course includes the use of modern tools used in astrophysics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 621. Thermodynamics and Kinetic Theory. 3 Credit Hours.

An intermediate course in thermal phenomena, from both macroscopic and microscopic points of view.

Prerequisite: PHY 222 or PHY 206 and MTH 211 or MTH 310 or PHY 315.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 622. Solid State Physics. 3 Credit Hours.

Crystal structure, quantum theory of the electronic structure of solids, mechanical, electric, magnetic and optical properties of solids.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 625. Biological Physics 1. 3 Credit Hours.

Applications of fundamental principles from fluids, electrostatics, statistical physics to biological phenomena at molecular and neuronal levels; emphasis on quantitative picture of well-known biological systems; discussion of current research at the interface of biology and physics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 630. Plasma Physics I. 3 Credit Hours.

Kinetic theory of plasmas, adiabatic motion of charged particles magneto fluid dynamics, transport properties of plasmas in electromagnetic fields.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 640. Classical Mechanics II. 3 Credit Hours.

Lagrangian formulation, rigid body dynamics. Topics selected from fluid dynamics, non-linear oscillations, normal modes, phase plane analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

PHY 645. Introduction to Astrophysics. 3 Credit Hours.

Celestial mechanics, solar models, galaxies, distance scales, instruments.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 650. Electricity and Magnetism I. 3 Credit Hours.

The integral and differential forms of Maxwell's equations, circuit theory, and boundary value problems.

PHY 350: PHY 202 or PHY 212 Or PHY 222 and PHY 223 Or PHY 230 And MTH 211 or MTH 310 And Pre/Corequisite: MTH 311 Or Prerequisite: PHY 315.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 651. Electricity and Magnetism II. 3 Credit Hours.

A continuation of PHY 350/650. Further applications of Maxwell's equations with emphasis on radiation theory.

PHY 350/650.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 652. Optical Physics. 3 Credit Hours.

Geometric optics, interference and diffraction, polarized light, optical pumping, coherence phenomena, applications to modern physical research.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 660. Quantum Mechanics and Modern Physics I. 3 Credit Hours.

Introductory theory with applications to simple systems. Perturbation theory and atomic structure.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

PHY 661. Quantum Mechanics and Modern Physics II. 3 Credit Hours.

Applications of quantum mechanics to atomic and molecular spectroscopy, quantum statistical mechanics, and nuclear physics.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

PHY 701. Condensed Matter Physics Seminar. 1 Credit Hour.

Seminars on hot topics in Condensed Matter Physics.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 713. Methods of Mathematical Physics I. 3 Credit Hours.

A continuation of PHY 515.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 717. Special Topics in Physics. 1-3 Credit Hours.

Topics are typically selected from fluid dynamics, applied mathematics, particle theory, nuclear physics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 718. Special Topics in Physics. 1-3 Credit Hours.

Topics are typically selected from fluid dynamics, applied mathematics, particle theory, nuclear physics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 722. Advanced Solid State Physics. 3 Credit Hours.

Electronic structure, electron-electron interactions, phonons, many-body problems, transport properties, magnetism, superconductivity.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 723. Statistical Mechanics I. 3 Credit Hours.

Equilibrium state, irreversibility, statistical description of an ensemble, entropy, partition functions.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 724. Statistical Mechanics II. 3 Credit Hours.

Statistical description of many body problems, specific heats, Brownian motion in liquids and fields, non-equilibrium states, super-conductivity.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 752. Electromagnetic Theory I. 3 Credit Hours.

Electrostatics, magnetostatics, Maxwell's equations, continuous media, waves, antennas, resonant cavities, wave guides.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 753. Electromagnetic Theory II. 3 Credit Hours.

Relativistic effects, interaction of radiation with matter, multiple radiation, radiation reaction.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 766. Elementary Particles. 3 Credit Hours.

The Standard Model of elementary particles. Classical theory of fields for spin 0, 1/2, 1; Feynman rules. The Standard Model Lagrangian is postulated, and some of its basic consequences are explored.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 770. Quantum Theory I. 3 Credit Hours.

Transformation theory, linear operators and vector spaces. Schrodinger's equation, rotation group and angular momentum, statistics (Bose-Einstein and Fermi-Dirac), isotopic spin, multiple structure of levels, approximation methods.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 771. Quantum Theory II. 3 Credit Hours.

One particle relativistic theory; Lorentz group; symmetries of particles; elementary scattering theory; many body problems; Green's function techniques; S-matrix.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 780. Directed Readings or Research. 1-4 Credit Hours.

Research in Physics.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

PHY 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: LEC.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

PHY 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in PHY 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

PHY 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of PHY 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

PHY 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of PHY 740 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

PHY 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.
