

# M.P.P. MASTER OF PUBLIC POLICY

## Overview

The Master of Public Policy (MPP) is a graduate professional degree proposed by the Department of Political Science in the College of Arts & Sciences.

In contrast to the existing Master of Public Administration (MPA) degree, the MPP degree has a deeper focus on the development and effects of public policy, the use of quantitative analysis, the role of economic factors in public-decision making, resource allocation, and decision modeling. Building on the successful curriculum of the online and on campus MPA program, adding the MPP degree to the Department of Political Science's catalog continues to propel us into the ranks of preeminence among peer institutions that also offer both MPA and MPP degrees. Success of the MPP program requires collaboration between the Department of Political Science, other disciplines with a stake in public policy, and the College of Arts and Sciences to ensure that current resources are used effectively, existing strengths of the university and its faculty are built upon, and faculty are strategically added to develop a MPP program fitting for a hemispheric university.

## Admission Requirements

In cooperation with the College of Arts and Science, the Department of Political Science, the Graduate Program will review applicant files and make admissions decisions.

### Requirements for Admission Include:

- Completion of an application
- A baccalaureate degree from an accredited institution
- A cumulative undergraduate GPA of 3.0. (In order to limit class size for maximum teacher-student exchange, the MPP program will give preference to students with above average GRE scores, excellent letters of recommendation, and superior writing skills).
- GRE minimum combined score (verbal and quantitative) set by the Graduate School. The Graduate School has occasionally provided waivers for exceptional cases.
- Two letters of recommendation

## Curriculum Requirements

Code	Title	Credit Hours
<b>Required Core Courses</b>		
POL 601	Budget and Financial Management and Administration	3
POL 610	Statistics for Politics and Public Administration	3
POL 625	Comparative Public Policy and Administration	3

\*\* Completion of core and specialization track course requirements as specified by the POL Department in consultation with student's career goals and interests

\*\*\* All other requirements as stated in sections Requirements for the Master of Arts degree and General Information.

## Mission

The Masters of Public Policy (MPP) is a professional degree that provides students with core skills in economics, policy analysis and ethics. The program seeks to build professional competencies in research, analysis and evaluation of various public issues (e.g., social, global, economic, health) to enable formulation of effective policy solutions. The focus is on the development and use of quantitative analysis skills to assess public policy alternatives, while also developing and enhancing proficiency in management and the implementation process.

## Goals

The MPP degree stresses the research, analysis and evaluation of various public issues (e.g., social, global, economic, health) to develop effective policy solutions. In general, MPP programs give great attention to policy formulation, analysis and evaluation.

## **Student Learning Outcomes**

- Students should be able to demonstrate critical thinking and writing skills related to public policy, politics, ethics and economic analysis by the time they graduate
- Students will demonstrate quantitative analysis and oral communication skills
- Students will demonstrate analytical competencies through an internship or applied capstone project
